

EXPLORING BELIZE

1993

N-M-S

Second Circular

An informal one day conference by British organisations in Belize, to be held at the NMS, Chambers Street, Edinburgh on Friday 2 April 1993. There is no intention to publish any proceedings but it is hoped that a more formal international conference, possibly in 1996 to be held in Belize, would aim to publish the work of researchers worldwide.

Programme on Research Themes and Interests
